FAQ:

1: Why can not open the PDA?

(1) Pressing the power button need about 4s, so pls press the power button until the screen showing contents.

(2) Pls check the if the battery have power, put the battery to PDA and charge it, if the screen shows charging icon, charge the PDA for some time and restart it.

2: PDA can not connect to PC?

If you connect the PDA with your PC, no prompt messages, pls change another cable to test, if not work, pls change another PC.

3:When use scanner, there is no data but scan-light on, why?

1: Go to scan setting, and check "keyboard output"

2: If checked, then pls reset the scan demo for twice, and operate " off" – "ON" .

4: How to use the battery correctly?

The battery is Li-ion battery, if no power, pls immediately charge it. Don't keep the battery with full power or no power for long time. The best way is keep 50% power of the battery to store it. And if you don't use the PDA for long time, pls pull out the battery from PDA and store it.
